

THE SUSTAINABLE MATERIAL DISRUPTING A 500 BILLION INDUSTRY

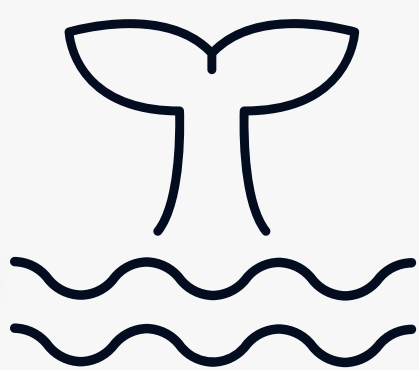

THE EXPONENTIAL RISE OF PLASTIC

Nearly 50% of all plastic was manufactured after the year 2000, and is expected to double by the year 2050.

PLASTIC MANUFACTURED PER YEAR
(IN MILLIONS OF TONS)

1 MILLION TONS EQUALS THE WEIGHT OF 5,000 WHALES

PLASTIC IS NOT JUST WATER BOTTLES, PLASTIC IS UBIQUITOUS

WHAT DRIVES DEMAND FOR ALTERNATIVES TO PLASTIC?

PLASTIC MANUFACTURED PER INDUSTRY
(IN MILLIONS OF TONS)

On average we ingest a credit card's worth of microplastics every week.

THE DAWN OF A NEW ERA HOW UBQ™ MATERIAL IS TRANSFORMING THE INDUSTRY

Made of 100% landfill waste

Substitutes oil-based plastic

Advancing a circular economy

Compatible with standard manufacturing

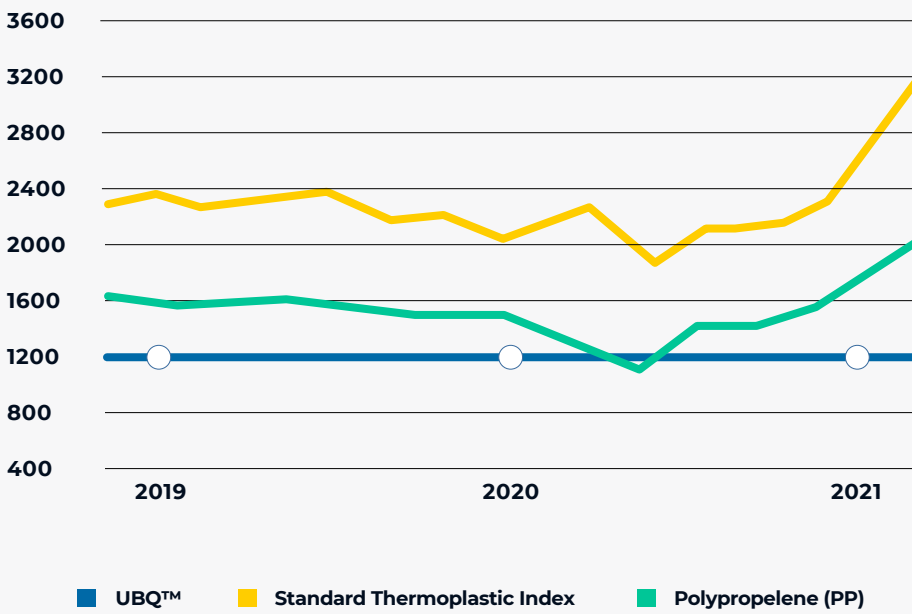

SAME SAME BUT DIFFERENT

UBQ™ VS. STANDARD PLASTIC

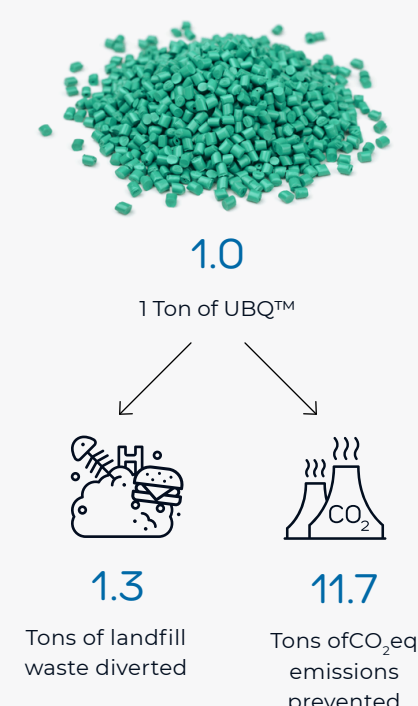

SUSTAINABILITY WITH AN ECONOMIC UPSIDE

A cost competitive material with long term price stability, another benefit of being made from waste instead of oil.

IMPACT IN NUMBERS

THE MOST CLIMATE-POSITIVE THERMOPLASTIC ON THE MARKET

DOING WELL BY DOING GOOD

UBQ™ TARGET ADDRESSABLE MARKET

INDUSTRY LEADERS CHOOSE UBQ™
