

# UBQ Materials: A Here and Now Solution

**UBQ Materials** is a global manufacturing company that has developed a patented technology that takes mixed municipal household waste, including organics and hard to recycle materials, and converts them into a new bio-based raw material, **UBQ™ Masterbatch**.

**UBQ™ Masterbatch**, is a climate-positive, thermoplastic composite. It enables the creation of more sustainable products without extracting new resources from the planet.

**TURN HOUSEHOLD  
WASTE INTO 100'S  
OF SUSTAINABLE  
PRODUCTS ACROSS  
MANY INDUSTRIES**

**BUILDING &  
CONSTRUCTION**

**RETAIL**

**CONSUMER  
DURABLES**

**SUPPLY CHAIN  
& LOGISTICS**

**AUTOMOTIVE**

## UBQ™ MASTERBATCH IS AVAILABLE NOW

**Seamlessly  
integrates** into  
existing production  
lines & processes

Delivers  
**price stability &  
competitiveness**

Measurable  
**carbon  
reduction**

**Safe** for both  
people and the  
environment

# NEW UBQ™ MASTERBATCH PORTFOLIO

The UBQ™ Masterbatch Portfolio makes it easy to combine with many polymers such as:

PP

PS

ABS

POLYOLEFINS

ELASTOMERS

UBQ™ Masterbatch is ideal for injection molding, and includes a low flow option for extrusion.

## EASY HANDLING & INTEGRATION

- Dust free feeding with conventional plastics infrastructure
- Avoids or reduces need for drying

## EXCELLENT DISPERSION & CONSISTENCY

- Maintains mechanical and flow properties of the polymer
- Consistent low odor processing

## COST COMPETITIVE

- Enabled by high concentration of UBQ™, lower handling costs, excellent dispersion & performance consistency

## MEASURABLE CARBON IMPACT

- UBQ™ production yields negative carbon footprint

## WORLD CLASS PRODUCTION FACILITY TO SUPPORT GLOBAL DEMAND

## FULLY OPERATIONAL

55,000 square meter facility in the Netherlands  
80,000 tons of UBQ annually  
104,600 metric tons of waste diverted

## THE HIGHEST INDUSTRY STANDARDS

### COMPLIANCES

### CERTIFICATIONS & VERIFICATIONS
