

# UBQ Materials: A Here and Now Solution

**UBQ Materials** is a global manufacturing company that has developed a patented technology that takes mixed municipal household waste, including organics and hard to recycle materials, and converts them into a new bio-based raw material, **UBQ™**.

**UBQ™**, is a climate-positive, thermoplastic composite. It enables the creation of more sustainable products without extracting new resources from the planet.

**TURN HOUSEHOLD  
WASTE INTO 100'S  
OF SUSTAINABLE  
PRODUCTS ACROSS  
MANY INDUSTRIES**

**BUILDING &  
CONSTRUCTION**

**RETAIL**

**CONSUMER  
DURABLES**

**SUPPLY CHAIN  
& LOGISTICS**

**AUTOMOTIVE**

## **UBQ™ THE MATERIAL**

**Safe** for both people and the environment.

**Compatible** with existing processes, polymers, and equipment.

**Suitable** for durable and semi-durable applications.

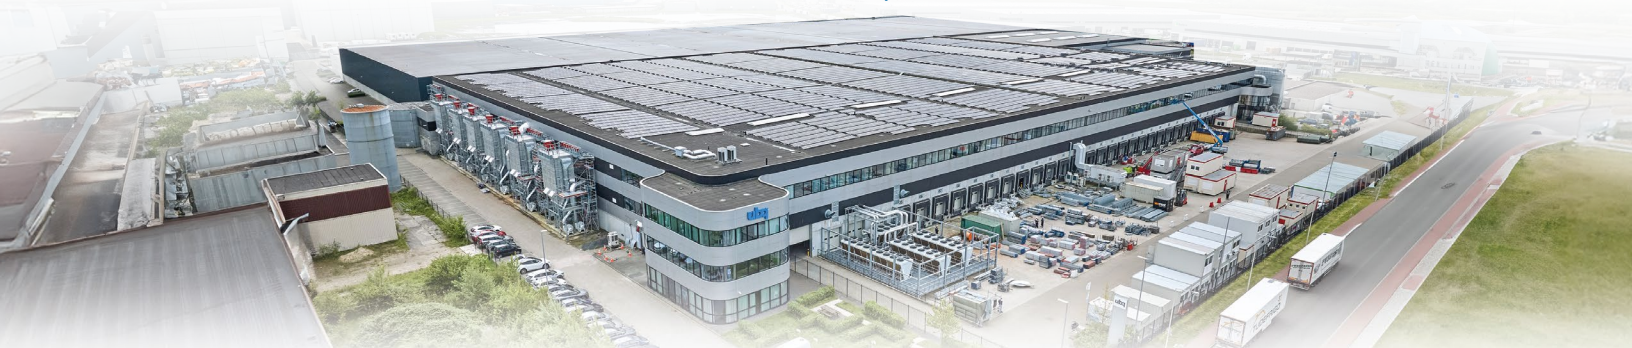

**Cost-competitive** and unaffected by fluctuations in fossil fuel prices.

## WORLD CLASS PRODUCTION FACILITY TO SUPPORT GLOBAL DEMAND

## FULLY OPERATIONAL

55,000 square meter facility in the Netherlands  
80,000 tons of UBQ annually  
104,600 metric tons of waste diverted

## THE HIGHEST INDUSTRY STANDARDS

### COMPLIANCES

### CERTIFICATIONS & VERIFICATIONS

## TRUSTED BY MANY GLOBAL BRANDS

Mercedes-Benz

## THE OPTIMAL SOLUTION WHEN LOOKING FOR SUSTAINABLE MATERIALS

- 

**Reduces reliance on petroleum-based plastics** and other extracted materials.
- 

**Removes carbon from the atmosphere** through the biogenic processes in the organic material.
- 

**Avoids methane and carbon emissions** generated by the decomposition of organic waste in landfills.
- 

**Encapsulates microplastics** present in the waste, preventing their release into the environment.
- 

**Highly recyclable**, promoting resource conservation and advancing the circular economy.
- 

Even a **small amount of UBQ in formulations** helps you advance toward carbon-neutral or climate-positive goals.
